JOB SUMMARY

Full Stack Developer with 8 years of professional experience building and deploying web applications end-to-end. Strong expertise in React, JavaScript, and Express.js. Experienced in taking complete ownership from product design and development to deployment and production support. Known for strong problem-solving skills, clean code, and delivering scalable, user-focused solutions.

SKILLS

Frontend: React.js, Next.js

Languages: JavaScript, TypeScript

Backend: Express.js, MongoDB, Node.js

Cloud: AWS Amplify, Lambda, Cognito, API Gateway, SES, CloudWatch

Integrations: Stripe Payment Integration, SendGrid Email Services, Google Analytics

WORK EXPERIENCE

Full-Stack Web Developer

Oct 2023 – Present

Tech Stack: React.js, Tailwind CSS | Node.js (Express), MongoDB | AWS Amplify, Lambda, API Gateway | AWS Cognito, SES, Stripe, SendGrid, OpenAI, Google Analytics

- Sole developer responsible for end-to-end architecture, technology decisions, design, development, deployment, and maintenance of a large-scale web platform connecting clients and attorneys for a US-based law firm.
- Designed and implemented core features including role-based access control, user onboarding, case management workflows, admin dashboards, and analytics visualizations.
- Built responsive, accessible, and performance-optimized user interfaces using React.js and Tailwind CSS.

- Implemented secure authentication, authorization, and social login using AWS Cognito with custom UI flows.
 - Integrated Stripe for subscription-based payments, including secure checkout, billing logic, and webhook handling.
 - Integrated OpenAI APIs for AI-driven case estimates and client-facing insights.
 - Implemented transactional and notification emails using AWS SES and SendGrid.
 - Set up Google Analytics to track user behavior and location.
 - Maintained and enhanced production systems, resolved bugs, and adapted features to evolving business requirements.
-

ProductsUp - Contract Engagements
Jan 2022 – April 2023

Frontend Developer – Short-Term Project | ~3 months

- Contributed to a short-term React-based experimental/innovative project for the India team.
 - Assisted in building UI components and proof-of-concept features.
-

React Developer

Rebbly, Coimbatore
May 2021 – Jun 2022

- Contributed to the development of a popup builder platform similar to Canva, focusing on interactive and animated UI components.
 - Built animated and gamified popups using anime.js and JavaScript.
 - Developed parts of a drag-and-drop builder using React and TypeScript.
-

Frontend Developer (Freelance)

Jan 2020 – Mar 2021 | Remote (Canada-based client)

- Developed reusable frontend modules using vanilla JavaScript without external libraries.
 - Designed custom JavaScript utilities as a lightweight, client-specific UI library.
 - Collaborated remotely with the client to gather requirements and deliver iterative improvements.
-

Frontend Developer

Infosys Equinox, Coimbatore
Dec 2014 – Dec 2019

- Worked as part of a large cross-functional team on enterprise and e-commerce applications, including the Toys“R”Us platform.

- Contributed to checkout and purchase flow components in frontend development.
- Built and maintained responsive, cross-browser-compatible UI using HTML5, CSS3, JavaScript, and jQuery.
- Implemented client-side logic and UI interactions to improve usability and reliability.
- Assisted in analyzing business requirements and supporting effort estimation.
- Optimized frontend performance through code cleanup and browser compatibility fixes.
- Gained early exposure to React while primarily working with JavaScript and jQuery.

EDUCATION

Bachelor of Technology (B.Tech) in Information Technology
Karpagam College of Engineering
2011 – 2015
